

Kahoot! Certified for schools

Advanced Certification

Master kahoots with “Play Again”

Welcome to Kahoot!'s Advanced Certification course on mastering kahoots with the **Play Again** feature, with our special guest host, Amber McCormick! Before we get started, please don't share these guides further, they are only for those getting certified! :)

Once you complete this course, you'll achieve the following learning objectives:

1. An understanding of the benefits of the **Play Again** feature
2. How to use the **Play Again** feature to help students master content

After you review the course material, you'll be ready to take the assignment via our app in order to receive your exclusive badge.

In order to complete the course assignment, you'll need to download the Kahoot! app to your iOS or Android device. You can find it in the [App Store](#) or on [Google Play](#).

Here's a reminder of how to open a Kahoot! challenge with the assignment:

1. After downloading the Kahoot! app to your mobile device, **log in** to your Kahoot! account – we need this info to be able to send you your diploma and badge!
2. When prompted to open the assignment challenge, **click the URL** to open the challenge in-app, or enter the PIN manually.
3. You'll then be able to **accept the challenge**, and play the assignment, which is structured as a multiple-choice kahoot quiz. You can do the assignment in short rounds taking breaks in between, or all at once.

What is Play again?

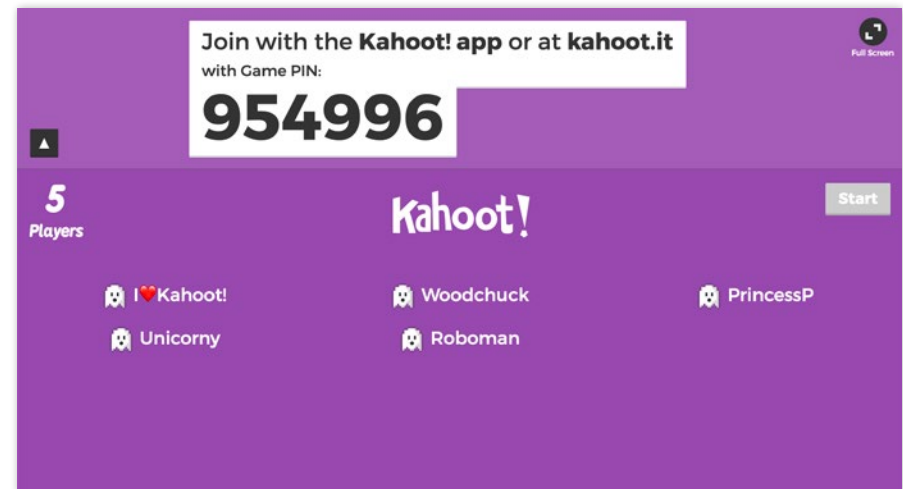

“Play Again” (formerly known as Ghost mode) is an alternative way to play games that, as always, is competitive and fun but also helps reinforce learning through repetition.

After playing a live Kahoot! game, you will have the option to play the same game again to practice and improve your score. By clicking **Play Again** button, the same game will be relaunched.

As well as your ‘live’ class, all players are joined by their **‘ghosts’!** These ghosts play the game alongside live players. They represent the scores of the players from the previous game, and their answers (and answer times) will be exactly the same as those the players attained in the previous game. You’ll also notice the Kahoot! Lobby music changes to a retro, 8-bit sound.

Pro tip When playing a game again, be sure to have players use the same nickname as they did previously, so their scores can be easily compared.

Play again allows you to compete against your previous score for content mastery. In this way, it makes learning through repetition competitive and fun: players will be focused on competing with themselves rather than others. This also helps create a feeling of accomplishment and builds confidence when players beat their previous scores and master the content.

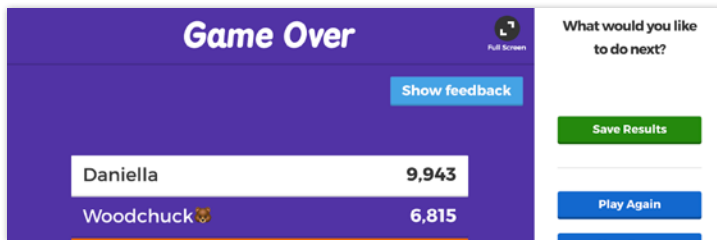

What is Play again?

How to access Play Again

You can access the Play again feature in two different ways:

1. When you finish a game of Kahoot! you will see the **Play Again** button. By clicking the button, you'll launch the same game again.

2. When accessing your game reports under **Reports**, click on the three dot dropdown next to an individual game report. Here, you'll also find the **Play Again** button.

Using Play again to master content

Now you understand how Play again works, let's explore some ways you can use it to master content.

► Master it quickly

Using the **Play Again** button on the final screen, play again immediately after a live game to reinforce knowledge with repetition.

► Group battles

Use **Play Again** with a different group of students from the first one: so one group plays against the results of a previous group. A study group can challenge other groups to spark healthy competition.

► Time is a great teacher

Using **Play Again** on the results page, get students to play against the ghosts of a kahoot played at the beginning of the topic or learning unit to measure progress over time. Don't forget to ensure they use the same nicknames to track improvement!

That wraps up Advanced Certification: Play

Again! Once you're ready to take the assignment, you can find the challenge link on the Kahoot! Certified page, and follow the instructions.
