

# Kahoot! 101: Assigning Kahoots

Self-paced learning and independent review help to personalize instruction, both in the classroom and beyond! With assigned kahoots, students can complete content offline, with opportunities to study and review difficult questions. Here's how:

Login to your kahoot Creator profile and find a just-right kahoot to play. Search on the **Discover** page, or use a template in your **kahoot library!**

Choose your kahoot and review questions and answers. Select “Assign” and choose a play deadline. Customize response types with personalized learning tools, too!

Monitor student progress, class performance, and change deadlines in the **Reports** tab. Remember: Game PINs are valid until the deadline passes!
