

Kahoot!EDU

Kahoot! boosts academic performance

New research shows that using Kahoot! has a strong positive impact in student's learning outcomes.

Download full report

Boosting academic performance

*"Kahoot! improved students' learning by 0.72 standard deviations. In practical terms, this improvement equates to **increasing performance on a typical test by a full letter grade.**"*

Meta-analysis published February 2024 of 16 independent, peer-reviewed studies across primary, secondary and tertiary education reveals **classroom use of Kahoot! improves student performance significantly.**

Globally documented impact

Systematic analysis of 155 peer-reviewed studies from 50+ countries reveal that Kahoot! has positive effect on **learning performance, motivation, classroom dynamics** and **attitudes.**

ESSA Level III certification

Kahoot! satisfies Every Student Succeeds Act (ESSA) Level III certification requirements, ensuring effectiveness and reliability.

Enhanced learning with kahoot!

Independent international studies and certifications reveal that Kahoot! increases **attendance, student participation** and **engagement.**

ICEIE-recognized solution

International Certification of Evidence of Impact in Education (ICEIE) recognizes Kahoot! as an evidence-based solution, boosting student outcomes.

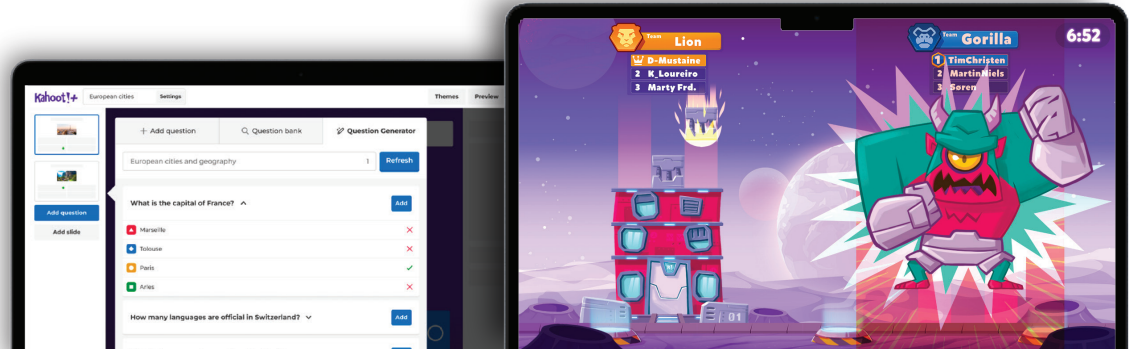

It is great to see Kahoot's dedication to evaluating the research conducted with its products and overall support for evidence that is increasingly demanded by the EdTech sector to deliver effective educational experiences for all learners.

Kahoot!EDU

The ultimate instruction toolkit

Simplify course planning

Our **AI-enhanced question generator** and **PDF-to-kahoot creator** make creating kahoots as easy as typing in a topic or importing a PDF document.

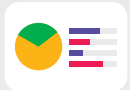

Engage students in review

Student-led game modes use repetition to reinforce knowledge through fun missions that progress with each correct answer.

Collaborate across departments or colleges.

Share folders and allow educators to collaborate on content creation across the department or university once easily onboarded through a single link.

Assess student progress

Game reports help you easily and accurately track student performance across multiple kahoots and export data in a click.

Introduce new curriculum

Slides with advanced layouts can be included before or after questions to introduce new topics, provide more context, or summarize learning.

Open up for self-study

Advanced study modes with learning goals encourage students to set weekly goals and review content with flashcards, study groups, and practice mode.

Foster classroom culture

Kahoot! Sparks provides a platform for creative expression and co-creation with the option to type or draw responses to unique prompts centered around collaboration.

Build future-ready skills

Student passes give your students access to the Kahoot! creator, advanced study modes with learning goals, and student-led learning.

Collect student feedback

Scale, brainstorm, poll, and **word-cloud** question types allow your students to provide active feedback on any topic from course material to social-emotional wellbeing.
